

# Plastics for the Food Processing Industry

## Cutting boards and finished c machined from Okulen 500 m

Okulen cutting boards are made of HMW-PE (high molecular weight polyethylene). These boards are extensively used for processing and preparing of foods in such industries as hotels, butchers, meat-, cheese- and fishprocessing factories. For the production of these boards we use modern machines with a high technical standard. This allows us to offer our customers, besides our standards, special colours and design for their specific client requirements.

physiologically harmless taste and flavourless

**Standard colours:**

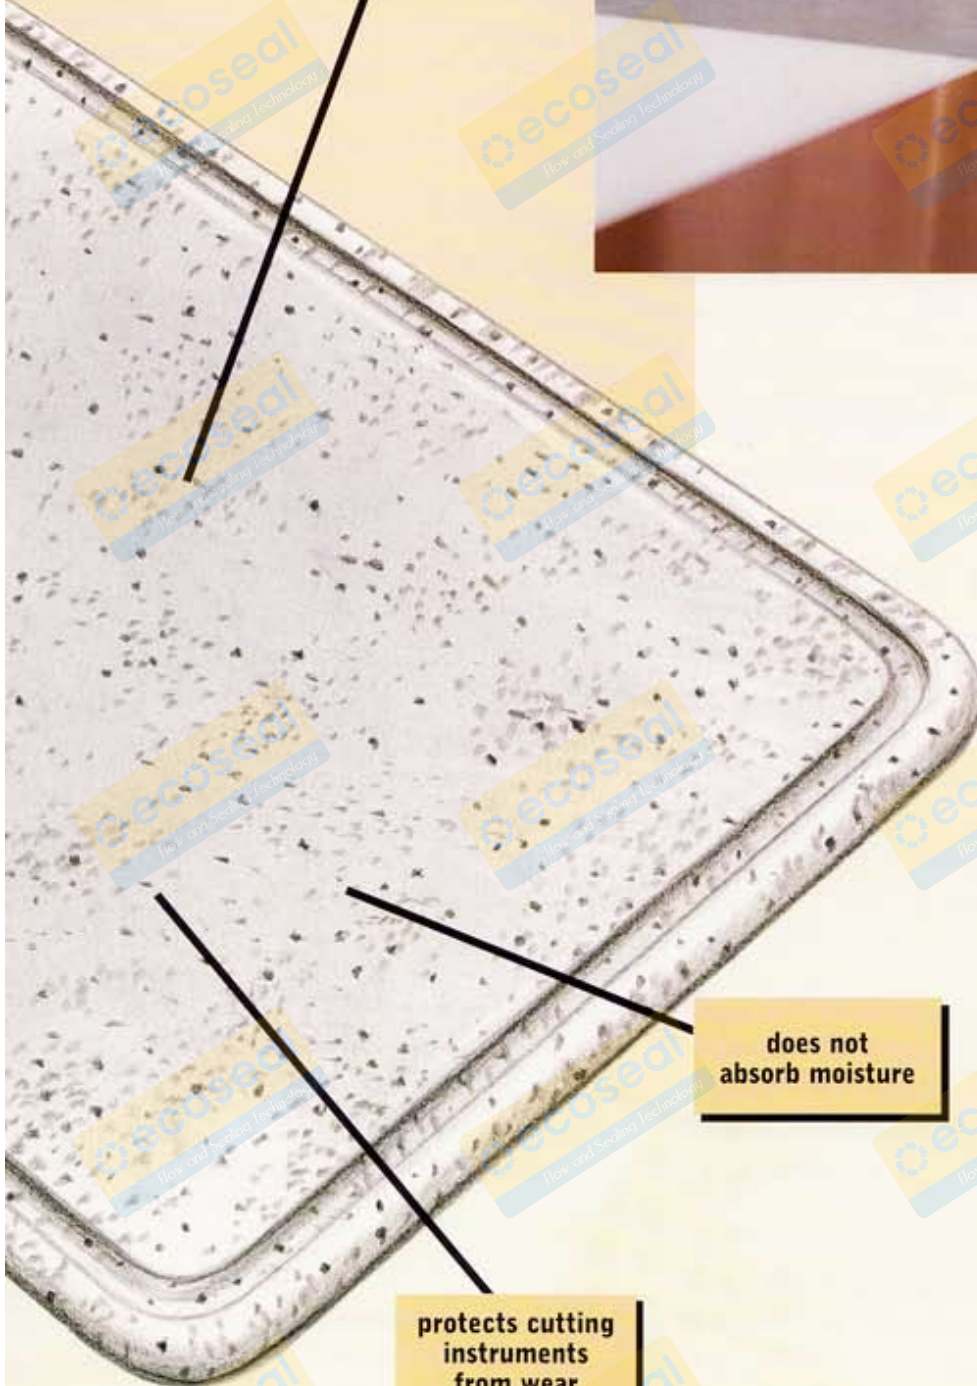

- |                          |                                   |
|--------------------------|-----------------------------------|
| <b>Green</b> (RAL 6024)  | <b>Yellow</b> (RAL 1021)          |
| <b>Red</b> (RAL 3018)    | <b>Natural/white</b>              |
| <b>Fine/coars marble</b> | <b>Brown</b> (RAL 8004)           |
| <b>Blue</b> (RAL 5015)   | <i>other colours upon request</i> |

easy to clean (dishwasher)

## Components Material

food approved

does not absorb moisture

protects cutting instruments from wear
