

Plastic Sheet Lining

Sheet Lining Material

- Teflon (PTFE)
- Teflon (PFA)
- Polyvinylidene Fluoride (PVDF)
- Halar (E-CTFE)
- Polypropylene (PP)
- Polyethylene (PE)
- Polyvinyl Chloride (PVC)

Plastic Sheet Lining Bondable with-

Metal or FRP. Suitable for variable temperature and service environment

- High oxidative stability
- Non-stick
- Heat resistance
- Low coefficient of friction
- Non-wetting
- Unique electrical properties
- Mechanical toughness
- Abrasion resistance
- Chemical resistance
- Flammability rating

Fluoroplastic & Fluorocarbon Coating

Fluoro Coating Material

- Teflon (PTFE)
- Teflon (PFA)
- Teflon (FEP)
- Halar (E-CTFE)
- Nylon / Polyamind
- Polypropylene (PP)
- Polyethylene (PE)
- Polyvinyl Chloride (PVC)

Fluoroplastic & Fluorocarbon Coated Carbon Steel, Steel Steel and Aluminum suitable for variable temperature and service environment

- High oxidative stability
- Non-stick
- Heat resistance
- Low coefficient of friction
- Non-wetting
- Unique electrical properties
- Mechanical toughness
- Abrasion resistance
- Chemical resistance
- Flammability rating
