

Polyurethane - Elastomer

Semi-finished parts

Sheets PUR 70%80 or 90 shore A
Standard sizes: 3000x1000 and 2000x1000
Thickness : 1 to 50 mm
Also available 1500 mm wide
and max. 6000 mm long, upon
request. Sheets with contact
layer/rib mesh

Round rods PUR 80 or 90 shore A
Standard sizes: Ø 20 to 200x1000 mm
staggered from 5 to 10 mm Ø

Hollowbars PUR 80 or 90 shore A
Available upon request

Supplied: in standard sizes, cut to size, bevelled,
drilled, roughened or welded

Applications: for die-cut parts such as screening mats
or packings; scraper bars; scraper blades; doctor
blades; deflectors; linings; spring elements; absorbers;
stoppers.

Customised mouldings

Parts moulded according to drawings such
as clutch stars or buffers, clamping jaws,
scrapers, floor padding, vibrator bases,
die-cutting counter linings, anti-crash rollers,
bearing bushes, pulleys, gaskets, spraying
nozzles, spring components and many
other parts are produced according to
customer specifications.

Manufacturing processes include both casting,
injection moulding, spraying and machining
(incl. water jet cutting). This often also
includes steel and PUR connections.

Bogie wheels and wheel coatings in
PUR-D15 are ideally suited to withstand
high dynamic loads.
